Title: Driver Behaviour in Simulated Environments: Challenges and Perspectives for Road Safety

Speaker: Margherita Pazzini

Date: **12 November 2026**, **9.30 -10.30 a.m.**

Abstract: Understanding driver behaviour is essential for assessing road safety and the interaction between road users and the environment. Driving simulation provides a controlled setting for investigating how different conditions influence vigilance, workload, and stress. Combining vehicle kinematics, eye-tracking data, neural and physiological measurements, and subjective assessments offers complementary insights into drivers' responses. This integrated approach supports the identification of potentially critical conditions and the evaluation of measures aimed at improving road safety.

PROGRAM

12 November 2026 (Marne)

-10.45-11.00 C. Lantieri, H. Imine

-11.00-11.10 S. Caro, EIFFEL

-11.10-11.30 Coffee Break

-11.30-11.50 J.P. Tarel, EIFFEL

-11.50-12.10 C. Mazzoli – M. Fabbiano, UNIBO

-12.10-12.30 S.S. Ieng, EIFFEL

-12.30-12.50 C. Villa, EIFFEL

-13.00-14:00 Lunch

-14.00-14.20 F. De Crescenzio – A. Lunedei, UNIBO

-14.20-14.40 C. Eyssartier, CEREMA

-14.40-15.00 M. Costa, UNIBO

-15.00-15.20 Coffee Break

-15.20-15.40 N. Farhi, EIFFEL

-15.40-16.00 V. Cirimele, UNIBO

-16.00-16.20 R. Belaroussi, EIFFEL

-16.20 Conclusion

13 November 2026 (Versailles Story)

-11:00 Immersive movements simulators visit: N-T. Dang
-13:00 Lunch
-14: 00 Impact 3D visit: D. Gruyer
